Coding Dojo Personal Project
Christopher Matthews

Overview
My personal project is a blog site. It will be a single site that will provide functionality for both reading the blog and composing/administering the blog. The admin/composing features will only be unlocked when an administrator logs into the site.

Minimum Viable Project (MVP) Features
- Login and Registration (required for admin, optional for readers)
- Ability to navigate and search blog entries
- Ability for readers to comment and/or like blog posts
- Admin section of website that includes ability to:
    - Compose new blog posts
    - Manage user accounts
    - Manage blog categories/tags
    - Manage blog comments
- Ability for admin to delete blog posts

Additional Desired Features
- Grid layout with highlight carousel for top blog posts on main page.
- Ability to subscribe to blog and receive weekly e-mail summary of new posts.
- Rich-text editing in blog composition (finding and using existing available API)
- New blog posts can also be uploaded from a file so admin can use other authoring tools.
- Applications is functioning on a deployed server.
